Chronic Condition Data Warehouse
Your source for national CMS Medicare and Medicaid research data

Blue Button® API on FHIR® Test Files

April 2017

Version 1.0

Section 1: Introduction

Blue Button was established in 2010 as a joint effort of CMS and the Veteran's Administration and was created to assist program participants with accessing their electronic health information. Since that time, Blue Button has been used by more than one million beneficiaries to download their CMS information via the MyMedicare.gov portal. However, the current text and PDF downloadable files currently delivered by Medicare Blue Button become challenging when handling large amounts of data, or converting the content into reusable data for further analysis. The Blue Button® API on FHIR® project aims to enhance CMS' current Blue Button service to provide a developer-friendly, standards-based data Application Programming Interface (API) that enables beneficiaries to connect their Medicare claims data to the applications, services, and research programs they trust.

As part of the Blue Button API development efforts, a suite of synthetic Medicare claims and enrollment files have been developed to test the load process of the Blue Button® API on FHIR® application. These test files are for software developers to test application functionality in the development, testing, and demonstration of their applications. These test files are not a study or research file.

Although the files contain data elements typically found in standard CMS Chronic Condition Warehouse (CCW) Medicare beneficiary and claims data, *no actual Medicare beneficiary data were used to create the files.* The naming convention and format of the CCW data elements have been maintained, but the values of data elements were randomly generated. Section 2 describes the content and the structure of the nine files in the suite and section 3 lists the data elements and describes how the random values for each data element were generated.

Section 2: File Content and Structure

The suite of synthetic files consists of the following nine pipe delimited text files.

Medicare enrollment file	beneficiary_test.rif
Part A institutional claims files	inpatient_test.rif
	snf_test.rif
	hha_test.rif
	hospice_test.rif
Part B institutional claims files	outpatient_test.rif
Part B non-institutional claims files	carrier_test.rif
	dme_test.rif
Part D event file	pde_test.rif

The beneficiary enrollment file contains a subset of fields from the CCW Master Beneficiary Summary File (MBSF) layout. One million synthetic records were created with a sequential number generated to represent an individual record value (BENE_ID). The values of the remaining data elements were randomly generated. The BENE_ID on the synthetic test files will be mapped to a FHIR Patient ID in the FHIR Server, which users will access through accounts available from the public HHS GitHub site (https://github.com/HHSIDEAlab).

The Part A/B institutional claims files each contain the subset of fields from the CCW Medicare Fee-For-Service Institutional Claims layout that are appropriate for the claim service type. The files contain both base claim level fields and revenue center level fields. The institutional files contain records for a random subset of the synthetic records in the enrollment file. A random number of CLM_IDs were generated for the included BENE_IDs to simulate multiple claims for beneficiaries. A random number of records were generated for each CLM_ID to simulate multiple revenue center lines for each claim. No effort was made to ensure that base claim level fields have the same values for all records with the same BENE_ID and CLM_ID.

The Part B non-institutional files were constructed the same way as the Part A/B institutional claims files, simulating multiple claims for each BENE_ID and multiple line items for each CLM_ID. The values of the data elements were randomly generated.

The Part D event file contains the fields from the CCW Medicare Part D Event file layout. This file contains records for a random subset of the synthetic records in the enrollment file. A random number of PDE_IDs were generated for the included BENE_IDs to simulate multiple Part D drug events for the beneficiaries. The data elements were randomly generated.

Section 3: Synthetic Data Element Creation

The values of the data elements in the nine synthetic files were randomly generated, not extracted from actual Medicare beneficiary or claims information. Details for the generation of each synthetic data element are presented below.

BENEFICIARY TEST DATA	Variable Name	Generation Detail
1	VERSION	Oracle generated – all values = '5'
2	DML_IND	Oracle generated – all values = 'INSERT'
3	BENE_ID	Sequential numbers 1 to 1,000,000
4	STATE_CODE	Random Alpha 2 Characters
5	BENE_COUNTY_CD	Random Alpha 7 Characters
6	BENE_ZIP_CD	Random Numeric 8 Characters
7	BENE_BIRTH_DT	File creation date plus random number from 0 to 1000
8	BENE_SEX_IDENT_CD	Random Alpha 1 Characters
9	BENE_RACE_CD	Random Alpha 1 Characters
10	BENE_ENTLMT_RSN_ORIG	Random Numeric 1 Characters
11	BENE_ENTLMT_RSN_CURR	Random Numeric 1 Characters
12	BENE_ESRD_IND	Random Alpha 1 Characters
13	BENE_MDCR_STATUS_CD	Random Numeric 2 Characters
14	BENE_PTA_TRMNTN_CD	Random Numeric 1 Characters
15	BENE_PTB_TRMNTN_CD	Random Numeric 1 Characters
16	BENE_CRNT_HIC_NUM	Random Numeric 9 Characters plus Random Alpha 1 Characters
17	BENE_SRNM_NAME	Random Alpha 6 Characters

18	BENE_GVN_NAME	Random Alpha 4 Characters
19	BENE_MDL_NAME	Random Alpha 1 Characters

PART B CARRIER TEST DATA	Variable Name	Generation Detail
1	VERSION	Oracle generated – all values = '5'
2	DML_IND	Oracle generated – all values = 'INSERT'
3	BENE_ID	Sequential numbers 1 to 1,000,000
4	CLM_ID	Random number 1 to 100,000,000,000
5	NCH_NEAR_LINE_REC_IDENT_CD	Random Alpha 1 Characters
6	NCH_CLM_TYPE_CD	Random Numeric 2 Characters
7	CLM_FROM_DT	File creation date plus random number from 0 to 1000
8	CLM_THRU_DT	File creation date plus random number from 0 to 1000
9	NCH_WKLY_PROC_DT	File creation date plus random number from 0 to 1000
10	CARR_CLM_ENTRY_CD	Random Numeric 1 Characters
11	CLM_DISP_CD	Random Numeric 2 Characters
